## <u>Claims</u>

## We claim:

	1	A physiologically-acceptable agent, adapted to deliver a nucleic acid to a cell,
	2	comprising inorganic particles to which are bound a cell-binding component and the
	3	nucleic acid.
	1	2. The agent according to claim 1, wherein the particles are of a biodegradable
	2	metal oxide or a salt.
	1	3. The agent according to claim 1, wherein the particles have a polymeric
tent tent	2	coating.
1	1	4. The agent according to claim 2, wherein the particles have a polymeric
**************************************	2	coating.
1	1	5. The agent according to claim 3, wherein the coating is biodegradable.
'Start' - Parist'	1	6. The agent according to claim 4, wherein the coating is biodegradable.
: ::	1	7. The agent according to claim , wherein the particles are from about 5 nm to
i.	2	about 100 nm in size.
	1	8. The agent according to claim 1, wherein the particles are magnetisable.
	1	9. The agent according to claim 1, which additionally comprises a nuclease
	2	inhibitor.
	1	10. The agent according to claim 9, wherein the inhibitor is Group 3 ion.
	1	11. The agent according to claim 1, which additionally comprises a nucleic acid-
	2	binding protein and the nucleic acid comprises a segment having affinity for that protein.

1	12. The agent according to claim 1, wherein the nucleic acid is bound via a
2	complementary sequence linked to the particles.
1	13. The agent according to claim 1, wherein the particles are homogeneous
2	and/or substantially free of water-soluble material.
	B
1	14. The agent according to claim 1, for use in therapy.

- 14. The agent according to claim 1, for use in therapy.
- 15. An injectable composition comprising an agent according to claim 1 and a physiologically-acceptable diluent.
  - A physiologically-acceptable vector comprising the coated particles and bound cell-binding component, but not the nucleic acid, as defined in claim 1.
  - 17. A method for the treatment of a patient using gene therapy, said method comprising administering an effective amount of an agent of claim 1 to the patient.
